Sprint 6

Resurrected Tasks
User Story 11: As Bob, a TEQ Data Analyst, I would like to have the ability to create/save new report templates that will display selected categories and is compatible with the data collection software so that we can customize reports for certain agencies
Backend
* Task 24: Saving template as a file and retrieve it 1 story point (Alex)
* Task 37: Connect the plus button and new tabs 8 story points (Alex)

User Story 13: Bobbafet, The ICare system owner, I would like some of my workers to have limited access to the database to ensure some form of privacy (i.e. different level of worker can only generate certain reports):
Frontend:
* Task 28: Different interface based on level of user access after login 6 story points (call backend to find out the level, and then a different interface for (advanced) basic (fill out forms), intermediate-modify form but not create new ones) (Jacq)
* Task 38: connect front end to database and point towards right display 5 story points (Ray)

Quality of life:
Task 40: Label mandatory fields for Adam 2 story points (Jamie)
Q2: Polish old and produce new testing for new tasks completed. 10 story points (Jamie)
User Story 14: Bobbafet, The ICare system owner, I would like to be able to add new ICare forms with new data fields. (Requires Bob overhaul)
Frontend:
Task 30: Create new form based on existing form by adding or modifying 6 story points (Alex)
Task 31: Creating a brand new form with all customizable fields
Task 32: Saving custom/modified forms and storing it in a file retrievable from agency submission software 1 story points (Alex)
Backend:
Task 33: Creating a new database for the new custom forms 8 story points (Ray)
Task 34*: modifying existing database and merging if modified

User Story 15: Adam, an Agency Clerk, I would like to be able to switch which template form I'm submitting. (Requires Adam overhaul)
Frontend:
Task 35: Select which form to use for submission 10 story points (Jamie)
Backend:

Task 36: Parse new form files 2 story points (Jamie)

Note:

1,2,3,5 are tested

Test needed for user stories 6-15, excluding 8

Merge still required for (merge 5 and 6 user stories as they are similar) 5, 11, 12

User story 10 will be deleted

User story 7 has been shelved

1,2,3,4, user stories are done

8,9 are done, need deployment.

Acceptance tested 1, 2, 3, 4, front end of 11, 13

Jamie doing video (Sunday, don't merge after sunday)

Do unit testing and acceptance testing
